Description

testing dynamic reference qualifier

Script

```
1 var TestingRefQualifier = Class.create();
2 TestingRefQualifier.prototype = {
3   initialize: function() {
4
5   },
6   getUserGroups: function() {
7     var grp = [];
8     var user_grp = new GlideRecord('sys_user_group');
9     user_grp.addQuery('user', gs.getUserID());
10    user_grp.query();
11
12    while (user_grp.next()) {
13      grp.push(user_grp.group.getDisplayValue());
14      //grp.push(user_grp.group);
15    }
16    return 'sys_idIN' + grp.toString();
17  }
18 }
```
